PROJECTS

Shopalot | github.com/Calvinmac633/shopalot | shopalot-checkitout.herokuapp.com/
- Mobile application that makes shopping for family and friends easier. Create new, or join existing shopping lists that can be viewed and updated by other members who are given access.
- As the original proposer of this idea, I was involved in the full-stack development of this application. I was in charge of setting up the back-end structure, as well as played a major role in the front-end user interface.
- React.js, MongoDB, Materialize-ui, and express routing.

Note Taker | github.com/Calvinmac633/note-taker | http://sleepy-sands-76241.herokuapp.com/
- A dynamic application that allows you to create, update, and delete notes. Notes can be saved to be referenced later, even after closing the application.
- Responsible for the front-end logic of updating notes, as well as the back-end storage of user's notes.
- JavaScript, RESTful APIs, Bootstrap, and express routing.

Weather App | github.com/Calvinmac633/weather-app | calvinmac633.github.io/weather-app/
- A front-end application that builds upon a public weather API provided by openweathermap.org. Search by city to get current weather along with a 5-day forecast.
- Sole developer, in charge of all components of the application.
- JavaScript, RESTful APIs, Bootstrap, HTML, CSS.

PROFESSIONAL WORK EXPERIENCE

Willis Towers Watson, Philadelphia, PA   June 2017 – present
Actuarial Analyst
- Analyze financial results and research data issues
- Identify and communicate technical/analytical issues to project team
- Apply SQL coding to manipulate and organize client data
